

## Short-Listed Tasks:

**Task 1:** Looking for a park with a playground for my little brother.. To find information I would search on google or look at google maps to try and determine if the park has a proper playground. **Searching for parks with specific features (playground, pet-friendly, etc)**

**Task 2:** Looking on different websites for reviews and ratings on parks. People will often make google searches to find ratings and reviews or sometimes Yelp if the park they are looking for is available there. This will be a consolidated way to look at parks specifically. **Viewing reviews and ratings for parks.**

**Task 5:** Utilize a quick safety reporting feature while at the park to report instances of unsafe behavior / poor park conditions, such as public indecency or cleanliness issues. **Reporting safety issues or maintenance concerns.**

**Task 6:** Search for public events planned in a specific park or organize public events within parks, leveraging online platforms or community resources. **Searching for events or organizing park-based functions.**

## Key Aspects to Sketch:

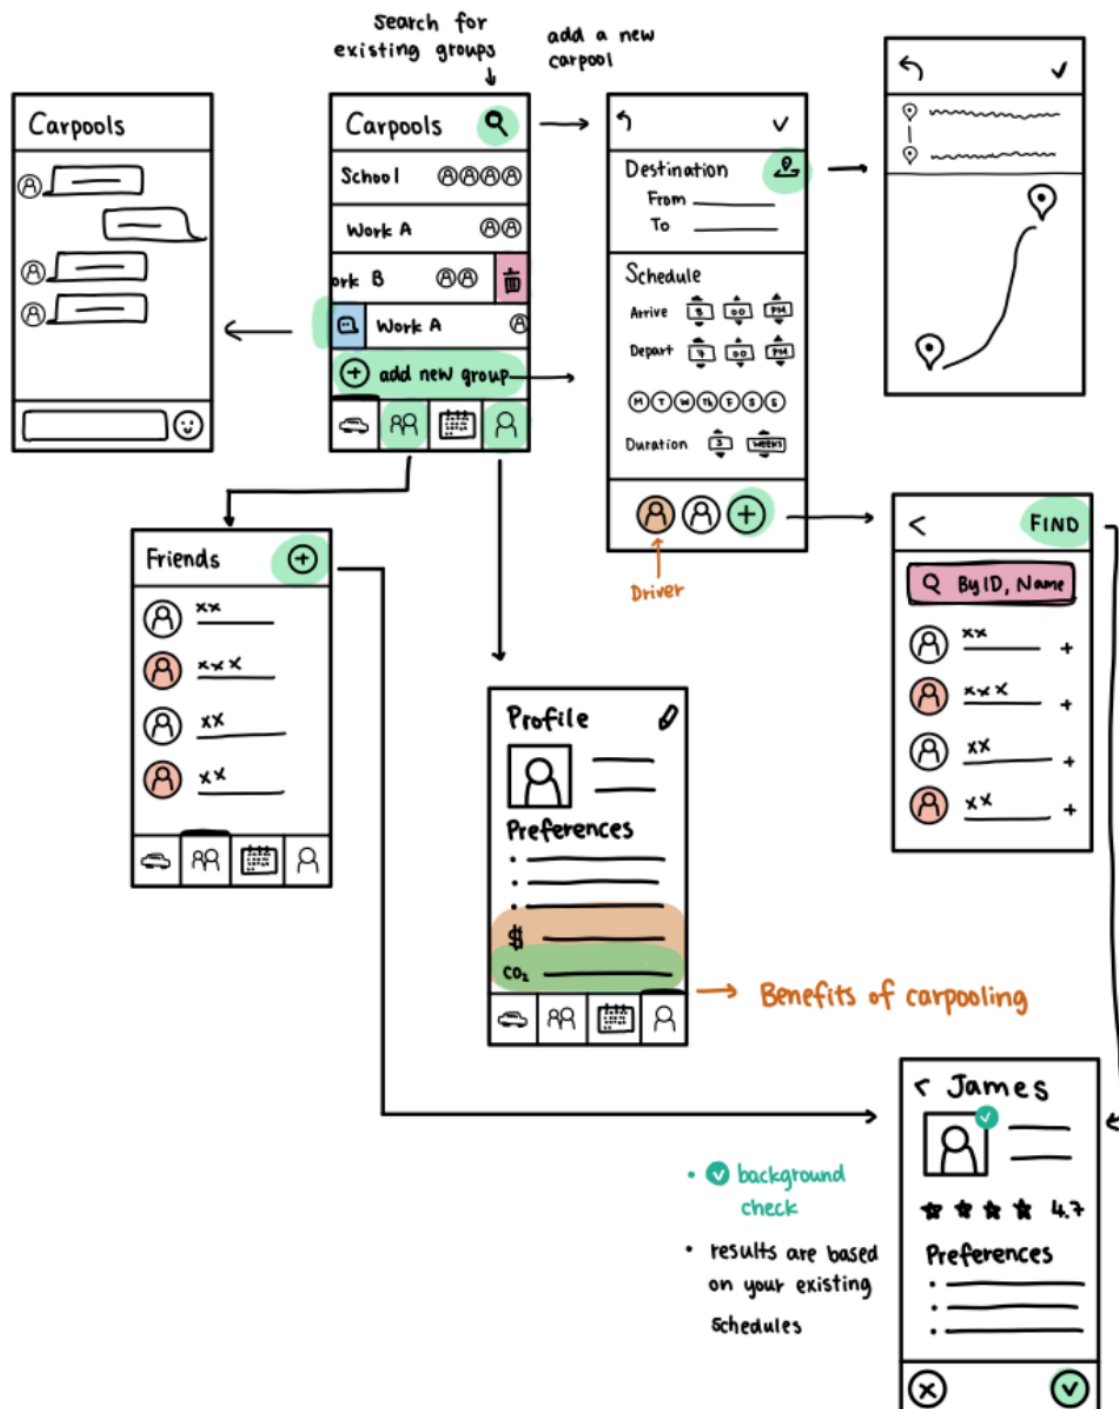

- Home page layout with search and categories (e.g., location-based or feature-based).
- Detailed park pages with reviews, ratings, and reports.
- A map interface with pins indicating park locations.
- Reporting tool UI for safety/maintenance issues.
- Event scheduling and announcement tools

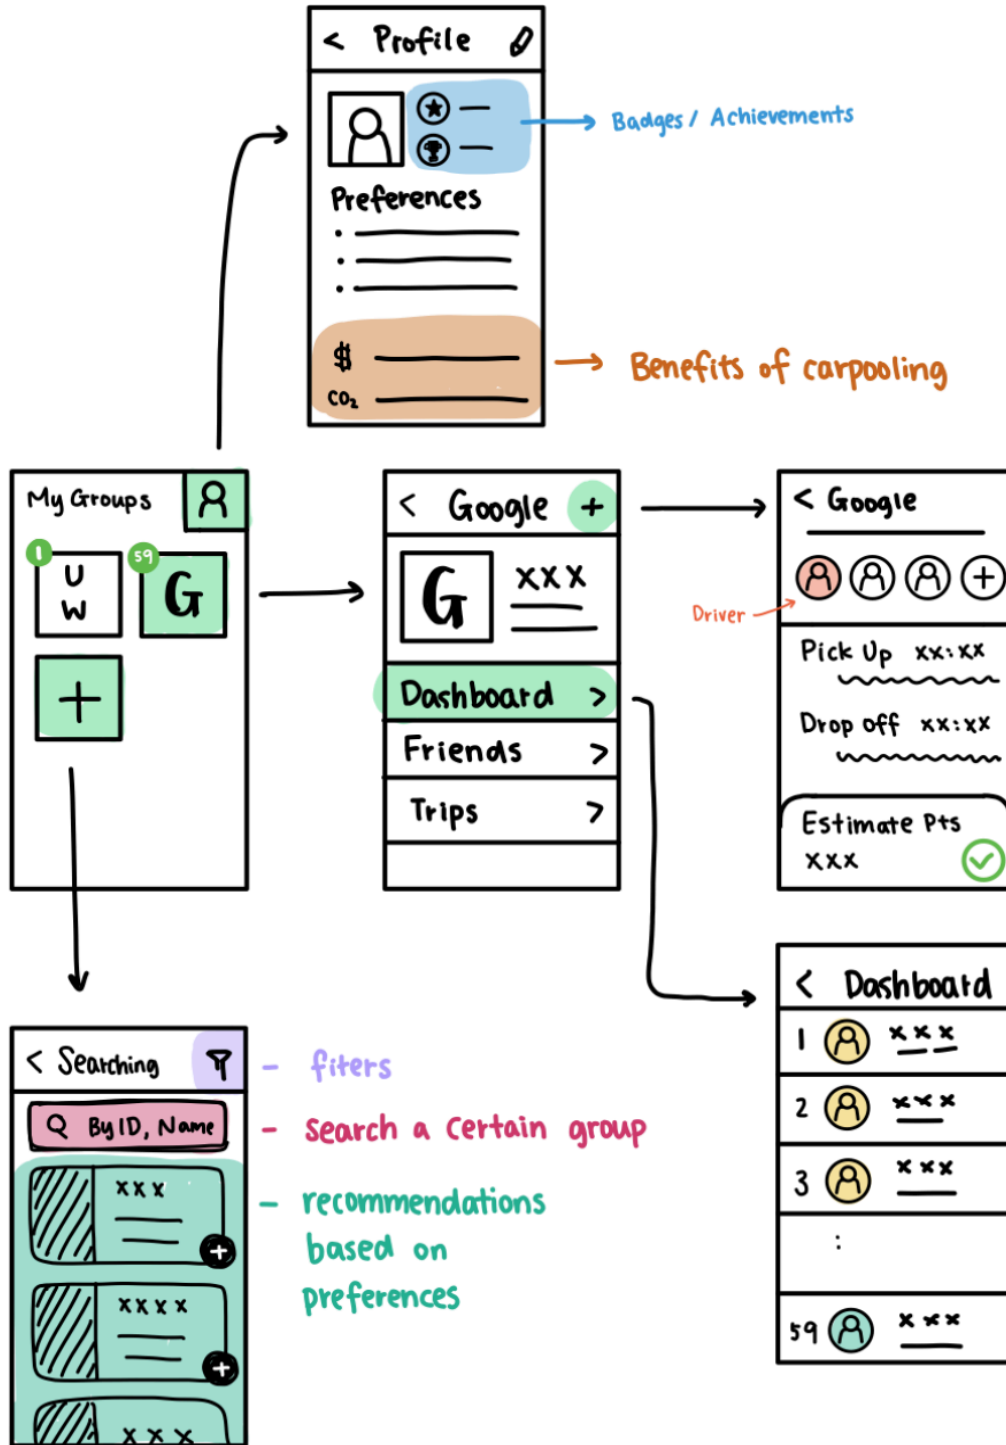

**Goal:** Make rough sketches of interface designs, focusing on how the tasks will be performed. Incorporate features like ratings, search, safety reporting, even organization, etc. Consider how different user types will navigate the platform.

## Notes:

- Search bar and filters, take location or park name, with filter options for playground, pet-friendly, restrooms, trails, seating, etc
- Map integration, map with icons showing parks that match search criteria
- Park profiles, each park page lists its amenities, images, and user submitted tags confirmed features
- Reviews of parks pulled in from other platforms if needed, page for reviews of park

- Ratings based on cleanliness, safety, accessibility, etc
- Sort reviews by most recent, highest to lowest ratings, most relevant, etc
- Have a quick report button in park profile
- Categories for reports, broken equipment, trash, light issues, vandalism, etc
- Anonymous reporting (no account needed)
- Events tab listing upcoming public events, trash cleaning, community gathers, games, etc
- Event creation, can submit events with descriptions, date, time, and RSVP options
- Notifications, users can follow parks to get updates and news about events
